

Outside Parking Area

To accommodate major overhauls, the outside parking area can store up to 20 vehicles awaiting repair and/or repair parts.

Tool Distribution Center

The Tool Room is well stocked with standard and metric tools. Many specialty items are also available including air wrenches, spring and strut compressors, volt and amp meters, drills and a hand held engine scanner for domestic and Asian cars.

Service

All services available are on a first come, first serve basis with the exception of the paint booth, which must be reserved in person.

Safety

A safety course is required for all patrons using the facility. Course covers safety procedures to be followed while using the shop as well as proper use of standard equipment. Authorization card will be issued upon successful completion of course.

Smoking

Smoking is allowed outside the building ONLY.

If you have any questions, please contact Ken Fletcher at (803)751-5755. Thank you for your time and have a wonderful day!

The Fort Jackson Auto Craft Shop is located at 5669 Lee Road, across from the NCO Club. The Auto Craft Shop's Mission is to provide recreational opportunities, promote morale, and to develop, increase and sustain automotive skills of authorized patrons. We are open to all service members, retirees, DA civilians, Fort Jackson civilians, National Guard members, Reservists, and the families of all aforementioned patrons. Community Recreation Division has made all of this possible by providing you with a facility, equipment and tools. Also available to you is personalized instruction, maintenance and repair assistance while working on your vehicle whether it is a truck, car, van, motorcycle, scooter or boat.

The Staff

The Auto Craft Shop consists of a manager, two full-time employees and one flexible employee. The courteous and professional staff is well trained in the automotive areas and will assist you in any way possible.

The Shop

The shop has a total of 14 stalls which are divided into areas; 8 minor maintenance stalls, 6 major overhaul stalls, 10 lifts, a bench work stall and 2 paint booths. Lifts and floor jacks that will lift any type of vehicle are located throughout the shop areas. Jack stands in two and five-ton capacities and transmission jacks are available for use, also. Patrons are not permitted to work on a vehicle supported by one jack only; therefore, the shop provides ample jack stands for each stall.

Paint Booth

The newly installed paint booth is equipped with a down draft air filter system and is used for mild wet sanding and painting only. Our other paint booth, also equipped with an air make-up unit and a filtering system, is used for prep and priming only. Both allow for painting year round.

Bench Work Area

The machine room has tables with a bench vise, a hydraulic press, a grinder and a drill press. This area is equipped to rebuild engines, transmissions and other parts. The machine room is treated like all other stall areas in the shop; patrons sweep and clean the tables after each use.
